

## CALSCAN HAWK 9500

CALSCAN HAWK 9500 is changing the gas flow measurement and service industry. With his reliable design, easy to use flow computer that goes beyond everything else on the market today. Its battery powered flow computer with a difference. It has been designed for simplicity and ease of use and to reduce the total cost of ownership.

The Hawk 9500 uses windows based programming and the unique “SD” Card slot for setup and uploading/downloading of all engineering units and uses AGA3, AGA7 and AGA8 for compressibility calculations.
